ABOUT THE COMPANY

Established in 2017, Zai Veterinary Centre sells agro inputs (Veterinary medicines, vaccines, animal feed materials, animal feed premixes, feed additives and equipment) and manufacture animal feeds.

Zai Veterinary Centre collaborates with local populations, engaging them in provincial agricultural operations and projects by creating job opportunities during the projects.

Zai manages diverse farming and livestock projects impacting the lives of millions, and is committed to providing people with new opportunities.

VISION

Our vision is to be a leader in the conception and implementation of agricultural projects, with a focus on the establishment of agricultural farms, farm management and operation, sales and marketing of agricultural products.

VALUES

*Empowerment.
Community.
Collaboration.
Continuous
improvement.
Humility and
service.*

CEO STATEMENT

What I cherish most about Zai Veterinary Centre is the wealth that our projects bring to the community and to our clients.

From the first day of planning the project, we feel connected to the community, connected to the environment in which the project is about to be placed.

We feel that besides the business, we are there for the people that will benefit from the project, both directly and indirectly, starting from our client and its personnel up to the service suppliers and the consumers.

ISRAEL MWALYAJE – CEO

MSc.Agricultural Education and Extension, Bsc. Animal Science

Israel is a highly experienced manager, a warm people's person, with advanced problem-solving skills. With a consistent record of managing complex projects, Israel is a great leader who motivates and drives Zaito success in every project.

*We look beyond
the business and
develop a connection
with the client that
is both caring and
professional*

OUR TEAM

Our team is our most valuable asset. It consists of first-class professional managers with over 15 years cumulative international experience.

We have a "One Team" attitude and approach to work, we engage equally and efficiently to deliver the best project to our clients.

Although we have a pragmatic drive for action, our approach is also friendly and down to earth, as we collaborate with both international organizations and the local communities to achieve the goals of our projects.

We care about the relationships we build with our clients and members of the community. Just as much as we care about getting things done.

Advanced solutions for open field grain production. We work in close contact with leading seed companies including research regarding best seeds for each region to achieve both resistance and high yields.

Feed Mills

Large variety of feed mills including silos for storage and packing facilities designed for flour milling and livestock feed production.

MANAGEMENT & OPERATION

As part of our commitment to deliver a functional project that will thrive for many years, we offer our clients services to manage and operate the projects during the first 1–3 years, and in some cases longer. The farm management and operational services we offer include the following components:

- 01 **Recruiting and training all the staff to fulfill the necessary functions.**
- 02 **Procurement, purchase, supply, and logistics of raw materials.**
- 03 **Placing full-time expatriate managers on the farm.**
- 04 **Managing the farm's sales and accounting.**
- 05 **Issuing reports about the operation of the farm.**

*can proudly say that
farm management
is one of the main reasons
why our projects thrive long
after we leave*

Farm visiting and provision of skills in Villages

Officials from the Ministry of Agriculture

Thanks to the connection with Zai, all our agriculture extension work has become more organized. We have accumulated a lot of experience through our cooperation with Zai and we can already see how our performance will improve in the future.

Daudi Mwalusamba

CFO, Zai Vet Centre

It is a great pleasure, for me and my colleagues that work here at Zai Vet to impact millions of lives through real life changing agricultural work.
